FLORAL DESIGN

Go Green with Botanica!

Botanica Floral Design is an eco-friendly floral studio providing exquisite flowers for events of all kinds throughout the Portland/Vancouver Metro Area. We specialize in local, organic and sustainably grown flowers and work closely with many NW growers in order to provide you with the freshest flowers, seasonal botanicals, fruit, berries, and other natural & unique elements to make your event easy on the planet while not compromising style or pizzazz.

Creative & Unique Ideas

Every client is different; therefore, so is every event. We love the challenge of creating something unique and special to make your event one of a kind. We partner with many industry professionals and can create a complete design package just for you, or focus mainly on the florals. We will work within your budget; from small, simple and sophisticated to large, lush and loud! No event is too big or too small.

So let us help you create the event of your dreams with the knowledge that you can make a big impact on your guests with little impact on the environment!

Give us a call today to set up your free consultation.
